DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,625,262 in view of Grady et al. (US 5,625,404, hereinafter "Grady").

Claims 1-20 of U.S. Pat. No. 6,625,262 are the same as claims 21-39 of the present application except they do not recite the controller as being "located at a central office...and in operative communication with a plurality of subscriber premises" (claim 21, lines 1-3; claim 31, lines 2-3) or a "central office controller" (claim 35, line 1). However, Grady teaches the well known placement of an ADSL communication controller at the central office (session manager 320 at central office 10 and in communication with a plurality subscriber premises via subscriber ports; Figs. 1, 2, 3a; col. 8, lines 13-67) such that it would have been obvious to an artisan of ordinary skill to place the controller of claims 1-20 of the patent within the central office, as taught by Grady, for controlling access to the broadcast data.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gross et al., Hraster et al., McHale et al., and Henderson et al. show other relevant ADSL systems.
